

Case Study: Trusted, unified security and visibility across Azure cloud

Headquarter in Ahmedabad, an Indian Multinational Pharmaceuticals and Healthcare company is a leading manufacturer of generic drugs, healthcare & wellness products.

The company has developed & hosted an application for their Medical Representatives (MR) on Microsoft Azure Cloud to make detailed product information available through endpoints, report time tracking, manage & plan master details like doctors, chemists, stockists etc. all in one place.

Challenge

After adopting Microsoft Azure Cloud Platform, customer wanted to optimise its security control and insight, with minimal management and without additional risks.

As industry see some very creative attacks in recent times, staying ahead protecting company's intellectual property becomes a priority.

Customer decided to deploy & integrate security services platform to protect Azure virtual machines – guest OS, applications and data, against malware attacks, zero-day vulnerabilities, and data breaches.

Solutions

Silver Touch cyber security experts deployed and integrate a best-in-class solution: Trend Micro CloudOne Workload Protection.

Trend Micro CloudOne cloud security platform enabled intrusion prevention, virtual patching, integrity monitoring, log inspection, and malware prevention for all the application workloads running on Azure.

Workload Security delivers timely protection from attacks by leveraging the latest in global threat intelligence. Global threat intelligence continuously update, correlate, monitor billions of malicious URLs, emails, files, to stop malware, ransomware, vulnerabilities.

Trend Micro global research centres delivers 24by7 threat prevention & automatic protection against known & unknown threat for cloud.

Results

The choice of Workload Security for Azure met customer's requirements of meeting good antivirus and antimalware protection with intrusion prevention and virtual patching, with minimal management efforts.

As Trend Micro Cloud One is "as-a-service" solution, customer can always scale their security with Azure workloads needs, adjust their own policies and guarantees continues protection for now and in the future.
